DETAILED ACTION

Election/Restrictions

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Due to the numerous variables in the claims, e.g. R^1 , R^2 , R^3 , Z1, Z2, Alk1, Alk2, etc., and their widely divergent meanings, a precise listing of inventive groups cannot be made.

The following groups are exemplary:

Group I claim(s) 1-8 and 10-11 in part drawn to products of the formula (I) wherein Zi-Z2 is (a-1) and alk1 is alkylcarbonyl, alk2 is alkylcarbonylalkyl and R5is (c-1) wherein q is (d-1), one process for their preparation (e.g. process from claim 10), and one method of use (e.g. method of use in claim 11).

Group II claim(s) 1-8 and 10-11 in part drawn to products of the formula (I) wherein Zi-Z2 is (a-2) and alk1 is alkylcarbonylcarbonyl, alk2 is alkylcarbonylalkyl and R5is (c-1) wherein q is (d-1), one process for their preparation (e.g. process from claim 10), and one method of use (e.g. method of use in claim 11).

Group III claim(s) 1-8 and 10-11 in part drawn to products of the formula (I) wherein Zi-Z2 is (a-3) and alk1 is alkylcarbonyl, alk2 is alkylcarbonyl and R5is (c-1) wherein q is (d-1), one process for their preparation (e.g. process from claim 10), and one method of use (e.g. method of use in claim 11).

Group IV claim(s) 1-8 and 10-11 in part drawn to products of the formula (I) wherein Zi-Z2 is (a-1) and alk1 is alkylcarbonyl, alk2 is alkylcarbonyl and R5is (c-2) wherein q is (d-1), one

process for their preparation (e.g. process from claim 10), and one method of use (e.g. method of use in claim 11).

Group V claim(s) 1-8 and 10-11 in part drawn to products of the formula (I) wherein Zi-Z2 is (a-1) and alk1 is alkylcarbonyl, alk2 is alkylcarbonyl and R5 is (c-1) wherein q is (d-3), one process for their preparation (e.g. process from claim 10), and one method of use (e.g. method of use in claim 11), etc.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. Again, this list is NOT exhaustive as it would be impossible under the time constraints due to the sheer volume of subject matter instantly claimed. Therefore, applicant may choose to elect a single invention by identifying another specific embodiment not listed in the exemplary groups of the invention and examiner will endeavor to group the same. **If applicant is unable to elect a single invention, applicant may instead choose to elect a specific compound and examiner will attempt to group it.**

The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds claimed contain a phenyl moiety which can be taken as a whole for the technical feature, however, this feature is not a special technical feature under the rules because it was known in the art prior to the filing of the instant application and thus does not define a contribution over the prior art. The substituents on the phenyl moiety vary extensively and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is considered to be lacking and restriction of the invention in accordance with the rules of unity of invention is considered to be proper.

Art Unit: 1626

Additionally, the vastness of the claimed subject matter, the numerous provisos found in the claims, and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter.
